PROFILE SUMMARY

Software Engineer with 1+ year of experience in Full Stack Web Development using React.js, Next.js, Node.js, Express.js, TypeScript, JavaScript, MongoDB, and PostgreSQL. Skilled in building scalable REST and GraphQL APIs, responsive UI architecture, authentication and role-based access systems, and third-party API integrations. Experienced in Agile/Scrum workflows, unit testing (Jest, TDD), peer code reviews, and delivering performance-optimized, production-grade applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3, C++, Python

Frontend Development: React.js, Next.js, Redux, Redux-Thunk, Tailwind CSS, DOM, HTTP/HTTPS, SSL/TLS

Backend Development: Node.js, Express.js, NestJS, REST APIs, GraphQL APIs, Microservices, API Integration

Databases: MongoDB, PostgreSQL, SQL, NoSQL, Firebase Firestore

Authentication & Security: JWT, Authentication, Authorization, Role-Based Access Control (RBAC)

Testing & Quality: Jest, TDD, Unit/API Testing, Postman, Peer Code Reviews

DevOps & Tools: Git, GitHub, BitBucket, Azure DevOps, CI/CD, JIRA, Agile/Scrum, VS Code, WebStorm

WORK EXPERIENCE

Associate Software Engineer | CrossML Pvt. Ltd.

Nov 2025 – Present

- Engineered and maintained 5+ core modules for OneStone, an end-to-end travel management platform covering flight management, room allotment, employee management, commercial flight bookings, and hotel mess management, using React.js, TypeScript, and Redux-Thunk.
- Integrated 5+ Amadeus API endpoints to build an end-to-end commercial flight booking module, optimizing API handling and data processing to achieve 30% faster response times, and implementing search, filtering, fare selection, and booking workflows.
- Contributed to a real-time Check-in Management System using WebSockets, enabling instant status synchronization across 5+ application states/components and reducing manual refresh requirements by 40%.
- Delivered 2+ major modules, including Contracts and RFP, for the Procure AI platform using Next.js, while architecting 5+ reusable common components that improved code reusability, UI consistency, and maintainability across multiple modules.

Software Development Engineer | COOX

Dec 2024 – Feb 2025

- Built a fully functional online test dashboard from scratch with React.js, implementing 10+ interactive components and streamlining API integration for a seamless user experience.
- Developed and optimized backend REST APIs with Django and MongoDB, designing schemas and collaborating closely with backend engineers to streamline data flow and reduce API response time by 40%.
- Enhanced React Native and admin-panel applications by resolving 15+ UI/UX issues and optimizing performance, resulting in a 25% smoother user experience and 30% reduction in load time.

PROJECTS

Interview Preparation Platform — Next.js, Firebase, Vapi AI, Gemini AI

[Live Demo](#)

- Engineered a Next.js AI interview-preparation platform featuring 3+ modular mock interview workflows, a customizable AI chat interface, and reusable UI components to support personalized interview practice.
- Implemented 2-layer Firebase authentication and role-based access control with Cloud Firestore real-time synchronization, enabling secure user sessions and seamless data continuity across devices.
- Integrated 2 AI APIs — Vapi and Google Gemini — to develop voice-driven interview simulations with real-time AI feedback across multiple interview scenarios, improving the interactivity of practice sessions.

EDUCATION

B.Tech, Computer Science and Engineering

Jaypee University of Information Technology, Himachal Pradesh | 2020 – 2024
